The TMK-ME sets the standard for tactical medical aid backpacks. The Medic features seven interchangeable, modularized pouches that can be quickly pulled out and passed to a fellow provider. Large enough to hold supplies for multiple casualties, the Medic maintains a low profile and comfortable fit with adjustable waist, shoulder and sternum straps. With deep pockets, external hydration pouch, internal retainer bands, and a removable instrument panel, the TMK-ME is a necessity for any medic. Bag is Berry Amendment Compliant, made of 1000 denier Cordura nylon and MOLLE compatible with PALS webbing.

TACTICAL MEDICAL KITS (TMK™)

TMK™-MPI Tactical Medical Kit / Medical Panel Insert Kit

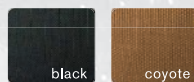

The TMK-MPI holds all the necessary supplies for TCCC recommended treatments with plenty of room for additional items. With its unique overlapping hinge system, the Medical Panel Insert can be oriented either vertically for backpack insertion, or horizontally for messenger bag insertion; simply pull apart the overlapping hinges and reconfigure the panels in your preferred orientation. The Medical Panel Insert can be used as a standalone medical sheet, and comes with three large removable mesh pouches, four small removable mesh pouches, and two small removable instrument panels. Made of 500 denier Cordura nylon and is MOLLE compatible with PALS webbing.

CUSTOM MEDICAL SOLUTIONS FOR THE *HARSH* ENVIRONMENTS ON EARTH

TMK™-CL Tactical Medical Kit / Combat Lifesaver

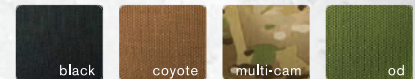

Based on the current U.S. Army Combat Lifesaver, the TMK-CL contains essential medical supplies to administer immediate lifesaving care. The Combat Lifesaver bag features a removable center panel that has an elastic retainer loop system on one side, a clear zip closure pocket on the opposite side, and a large hook-and-pile closure pocket in-between. The side retention straps prevent contents from falling out while the user is wearing the kit. The waist strap also doubles as a shoulder strap for quick mobility. Bag is Berry Amendment Compliant, made of 1000 denier Cordura nylon and MOLLE compatible with PALS webbing.

TACTICAL MEDICAL KITS (TMK™)

TMK™ IFAK *Tactical Medical Kit / Individual First Aid Kit*

The TMK-IFAK offers a unique design comprised of a Pouch and Insert, which can be used separately or combined into one complete system for quick and easy one-handed access to TCCC/TECC recommended supplies.

POUCH

- Double mag pouch dimensions
- Rapid deployment of supplies via elevator strap
- Multiple mounting configurations
- One-handed deployment

INSERT

- Fits most AR/M4 double mag pouches
- Large red grab handle easily identified and removed
- Contents individually secured and accessed
- One-handed deployment

POUCH & INSERT

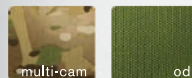

- Supplies always within reach via insert leash
- Capable of being mounted upside-down
- One-handed deployment

The TMK-IO contains essential medical supplies for an individual operator to administer immediate medical attention based on the three leading causes of preventable death on the battlefield: exsanguination, tension pneumothorax, and airway obstruction. The Individual Operator features an adjustable and removable thigh mount system with a zippered outer pocket. Internally, there is a three-layered upper pocket system, a two-layered lower pocket system, and an elastic retainer band for tourniquet placement – all designed for easy access while still mounted. Made of 1000 denier Cordura nylon and is MOLLE compatible with PALS webbing.

Available in:

Tourniquet Options: C-A-T or SOFTT-W
Size: 8" x 6.5" x 4"

#01274 / Kit / 2 lb. 3.2 oz.

#01273 / Bag / 1 lb.

CHINOOK MESH POUCHES AND NAME TAGS

These are the same high-quality pouches used in our TMK-ME, TMK-MO and LEMK-MCCI bags. Your supplies are easily identified through the mesh front, which also includes a 1" x 5" loop fastener name tag attachment point. Pouches are backed with heavy-duty hook fastener.

Available in:

#99015 / Large / 13" x 8.25" x 2.5"

#99016 / Medium / 13" x 7.5" x 1.5"

#99015 / Small / 6.5" x 7" x 1.5"

#99020 / Blank Name Tags (Coyote Brown Only; Set of 5) / 1" x 5"

CUSTOM MEDICAL SOLUTIONS FOR
THE *HARSH* ENVIRONMENTS ON EARTH

TMK™-MP Tactical Medical Kit / Medical Pouch Kit

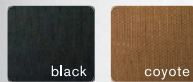

KIT CONTENTS:

- (2) Nitrile Glove
- (1) Tourniquet (C-A-T or SOFTT-W)
- (1) Compressed Gauze
- (1) Israeli Emergency Bandage, 4"
- (1) Nasopharyngeal Airway w/Lube, 28 Fr
- (1) Cloth Tape, 2" x 10 yd.

The TMK-MP is a simple and affordable way to carry the necessary supplies to address the three leading causes of preventable death on the battlefield: exsanguination, tension pneumothorax, and airway obstruction. Made of 1000 denier Cordura nylon and is MOLLE compatible with PALS webbing.

Available in:

Tourniquet Options: C-A-T or SOFTT-W

Size: 7" x 5.5" x 3"

#01269 / Kit / 1 lb.

#01268 / Bag / 4 oz.

TACTICAL MEDICAL KITS (TMK™)

TMK™-CTP Tactical Medical Kit / Covert Trauma Pouch

KIT CONTENTS:

| Personal Protection | Thoracic/Airway | Bandage Material |
|-----------------------------------|---|--|
| (2) Nitrile Glove | (1) Compact Wound Seal | (1) Mini Compression Bandage |
| | (1) Decompression Needle, 14 ga x 3.25" | |
| | (1) Nasopharyngeal Airway w/Lube, 28 Fr | |
| Bleeding | | Triage |
| (1) Tourniquet (C-A-T or SOFTT-W) | | (1) Tactical Combat Casualty Care Card |
| (1) Compressed Gauze | | |

The new TMK-CTP is an extremely low profile pouch that holds all essential TCCC recommended trauma supplies, including a tourniquet, chest seal, decompression needle, compression bandage, and room for your preferred hemostatic agent. Internally, the TMK-CTP has elastic retainer bands on the top flap designed specifically to hold gloves, a tourniquet, and a decompression needle. The bottom flap has a 4-way stretch pouch that is capable of holding more essential supplies. For its size, the TMK-CTP provides the operator with a low profile/low signature pouch while not sacrificing space or supplies. Made of 500 denier Cordura nylon and is MOLLE compatible with PALS webbing.

Available in:

Tourniquet Options: C-A-T or SOFTT-W

#01328 / Kit / 5.5" x 4" x 3" / 2 lb. 3.2 oz.

#01327 / Bag / 5.5" x 4" x 2" / 4 oz.

TMK™-UTQ Tactical Medical Kit / Universal Tourniquet Pouch

The TMK-UTQ pouch is designed to fit most tourniquets on the market, including the three Tactical Combat Casualty Care (TCCC) recommended tourniquets: the Combat Application Tourniquet (C-A-T), the Special Operations Forces Tactical Tourniquet (SOFTT), and the Emergency Military Tourniquet (EMT). The UTQ now comes with a 4" elastic retainer band on each side for better tourniquet protection, and is designed to fit belts 1" to 4" wide. Made of Mil-Spec nylon webbing and is MOLLE and duty belt compatible.

Available in:

Also available in: Black w/Black Pull Tab (LE option)

The TMK-UTQ will fit the following tourniquets:

- C-A-T • SOFTT • SOFTT-Wide • RMT Tactical
- EMT • SWAT-T • Ratchet • TK-4 • MET

#01324 / TMK-UTQ Pouch Only / 2" x 6" x 2" / 1.6 oz.

#01391 / TMK-UTQ Pouch with SOFTT / 5" x 2.5" x 2" / 6.5 oz.

#01392 / TMK-UTQ Pouch with SOFTT Wide / 5" x 2" x 2" / 5.6 oz.

#01393 / TMK-UTQ Pouch with C-A-T / 5.5" x 2" x 2" / 4 oz.

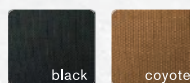

#01394 / TMK-UTQ Pouch with RMT / 5" x 2.5" x 2" / 4.8 oz.

TMK™-MEDS/IV/IO *Tactical Medical Kit / Medication / Intravenous / Intraosseous Bag*

The TMK-MEDS/IV/IO Bag is designed to carry medications, intravenous and intraosseous supplies in a highly organized, lightweight and transportable manner. Internal features include two vertical mesh pockets, a fold-out pocket with vial strand holders, a large clear center pocket, and ten 9" x 6" aLOKSAK® bags. The fold-out pocket has five vial strand holders capable of holding up to 20 vials. External features include a carry handle, shoulder strap, hook and loop 'MEDS/IV/IO' label, and a clear vinyl ID card holder. Made of 1000 denier Cordura nylon and is MOLLE compatible with PALS webbing.

Available in:

Size: 13" x 10" x 2.5"

#01320 / Bag / 2 lb. 6.4 oz.

TMK™-MEDS *Tactical Medical Kit / Medication Bag*

The TMK-MEDS Bag is designed to carry only mission-critical medication and administration supplies in a highly organized, lightweight and transportable manner. Internal features include four vial strand holders capable of holding up to 20 vials, five 9" x 6" aLOKSAK® bags, a large center mesh pocket, and a fold-out pocket with elastic retainer bands for custom organization. External features include a carry handle, shoulder strap, hook-and-loop 'MEDS' label, and a clear vinyl ID card holder. Made of 1000 denier Cordura nylon and is MOLLE compatible with PALS webbing.

Available in:

Size: 13" x 6" x 1.75"

#01340 / Bag / 1 lb. 12 oz. / NSN: 6515-01-625-4271 (CB)

TACTICAL MEDICAL KITS (TMK™)

TMK™-IV/IO Tactical Medical Kit / Intravenous / Intraosseous

The TMK-IV/IO is designed to carry mission critical intravenous (IV) and intraosseous (IO) infusion supplies in a lightweight and portable manner. Interior features include a mesh sleeve designed to hold up to a 1000 mL IV bag, including a pressure infuser, a large center mesh pocket, and a fold-out pocket with elastic retainer bands for custom organization. The IV bag is secured by an adjustable-length buckle strap and an elastic pull cord. External features include a carry handle that can be clipped around a fixed object for gravity-fed fluid therapy, a shoulder strap, hook-and-loop 'IV/IO' label, and a clear vinyl ID card holder. Bag is Berry Amendment Compliant, made of 1000 denier Cordura nylon and MOLLE compatible with PALS webbing.

CUSTOM MEDICAL SOLUTIONS FOR THE *HARSH* ENVIRONMENTS ON EARTH

TMK™-K9H Tactical Medical Kit / K9 Handler

Military working dogs (MWD), law enforcement K9s, and search & rescue dogs are often deployed on hazardous missions in which severe injury and trauma are a real danger. These kits include essential medical supplies to treat both K9 and handler casualties for injuries ranging from gunshot wounds, severe bleeding, and penetrating wounds to other non-life threatening medical conditions. Designed in conjunction with K9 professionals, these kits should be standard equipment for any K9 handler. Made of 1000 denier Cordura nylon and is MOLLE compatible with PALS Webbing.

KIT CONTENTS:

LAW ENFORCEMENT MEDICAL KITS (LEMK™)

CUSTOM MEDICAL SOLUTIONS FOR THE *HARSHEST* ENVIRONMENTS ON EARTH

LEMK™-MCCI KIT *Law Enforcement Medical Kit / Mass Casualty Critical Intervention*

The recent mass casualty shooting events in America have had a profound effect on all segments of society. The medical, law enforcement, fire/rescue, and EMS communities have each felt the need to respond. Recognizing that active shooter and other mass casualty incidents can occur in any community, Chinook has developed the new Mass Casualty Critical Intervention (MCCI) Kit as a solution to equip first responders with the right medical supplies at the right time. As with all our Law Enforcement Medical Kits, the LEMK-MCCI draws from extensive military field experiences, lessons learned from battlefield medicine, and proven TCCC techniques to bring agencies the necessary gear to save lives.

KIT CONTENTS:

Airway/Thoracic

- (1) CPR Mask w/O2 Inlet
- (2) Decompression Needle, 14 ga x 3.25"

Personal Protection

- (2) Hand Sanitizer, 1 oz.
- (4) Emergency/Survival Blanket

Go Bags 1, 2 & 3

- (4) Nitrile Glove
- (2) SWAT-T Tourniquet
- (2) Tourniquet (C-A-T or SOFTT-W)
- (2) Cinch Tight Bandage, 8" x 10"
- (2) Compressed Gauze
- (2) Pressure Bandage
- (1) CoFlex LF2, 2" x 5 yd.
- (2) Elastic Bandage Wrap, 3" x 4.5 yd.
- (1) Nasopharyngeal Airway w/Lube, 28 Fr
- (1) Oropharyngeal Airway, 90 mm
- (2) Bolin Chest Seal
- (2) Petroleum Gauze, 3" x 9"
- (1) EMT Shears, 7.25"
- (1) Permanent Marker, Extra Fine Point
- (1) Rapid Triage Ribbon Module

Immobilization

- (2) Combat Eye Shield
- (2) Splint, Orange, 4.25" x 36"
- (4) Triangular Bandage

Triage

- (2) Chem Light, Green, 12-Hr, 6"
- (2) Chem Light, Red, 12-Hr, 6"
- (2) Chem Light, Yellow, 12-Hr, 6"

Size: 19" x 12" x 7.5"

#01155 / Kit / 14 lb. 6 oz.

#01325 / Bag / 4 lb. 6.4 oz.

#01155REF / Refill (Contents Only)

The LEMK-MCCI is a lightweight and compact medical kit that provides first responders with systematically organized medical supplies to triage and treat multiple casualties that occur in active shooter/mass casualty events. Internally there are three identical "GO BAGS" containing the necessary supplies for hemorrhage control, chest wounds, and basic airway management. Designed to provide critical intervention on six patients, the MCCI Kit also has enough supplies for supportive care in the case of additional casualties. Made of 1000 denier Cordura nylon and is MOLLE compatible with PALS webbing.

LAW ENFORCEMENT MEDICAL KITS (LEMK™)

LEMK™-GSR *Law Enforcement Medical Kit / Gunshot/Range*

Patch attachment point (shown with optional Cross Patch, #901096)

Abrasion and water resistant material on bottom of bag

Shears
pocket

Hip belt pocket

Hip belt PALS row
for radio, TQ, etc.

Hip belt storage

The LEMK-GSR is a versatile medical kit designed for use at the range, in a patrol vehicle, or as a general events medical kit. The GSR is small enough to be worn around the waist via a hip belt that can store away when not in use, and yet large enough to hold all the necessary supplies for treating multiple injuries from minor scrapes to major wounds. The hip belt contains a small quick-access pocket for glove placement and two rows of PALS webbing for external tourniquet placement or radio pouch placement. Internally the supplies are neatly organized by multiple elastic retainer bands and three hook-and-loop closure pockets for content security. The LEMK-GSR strikes a perfect balance between size and capability. Made of 1000 denier Cordura nylon.

#02172 / Kit / 2 lb. 3.2 oz.

#02174 / Bag / 15.2 oz.

#02172REF / Refill (Contents Only)

Chinook's LEMK-IO Kit is designed to carry TCCC/TECC recommended medical supplies for the treatment of severe hemorrhage, airway obstruction, and tension pneumothorax. The LEMK-IO can be worn as a drop-leg pouch, or attached to any standard MOLLE-compatible system by completely removing the drop-leg harness. The LEMK-IO has six elastic retainers for items on the upper flap, and the bottom flap comes with a pocket and multiple elastic retainer bands for the remaining items. The LEMK-IO is reinforced on the top flap with an internal stiffener for structural integrity. Bag is Berry Amendment Compliant, made of 1000 denier Cordura nylon and MOLLE compatible with PALS webbing.

LEMK™-PO Law Enforcement Medical Kit / Patrol Officer

KIT CONTENTS:

| | | |
|-----------------------------------|------------------------------|---------------------------|
| (2) Nitrile Glove | (1) Burn Jel, 3.5 g | (10) Sheer Strip, 1" x 3" |
| (1) Tourniquet (C-A-T or SOFTT-W) | (1) Cloth Tape, 1" x 10 yd. | (1) Triangular Bandage |

Tourniquet Options: C-A-T or SOFTT-W Size: 6.5" x 5" x 3"

#02171 / Kit / 1 lb. 3.2 oz.

#02170 / Bag / 6.4 oz.

#02171REF / Refill (Contents Only)

The LEMK-PO Kit is a lightweight, low-profile medical kit designed to treat common injuries faced by law enforcement officers. As the first responder to most scenes, every officer should have essential medical supplies to help save lives. The bag's internal features include upper retainer bands for immediate access to critical supplies, such as the tourniquet and bandage, and a lower mesh pouch for loose supplies. Made of 1000 denier Cordura nylon, and MOLLE compatible with PALS webbing.

LAW ENFORCEMENT MEDICAL KITS (LEMK™)

LEMK™-CTP *Law Enforcement Medical Kit / Covert Trauma Pouch Kit*

KIT CONTENTS:

| | | |
|-----------------------|----------------------|---|
| (1) CPR Mask | (1) Compressed Gauze | (1) Nasopharyngeal Airway w/Lube, 28 Fr |
| (2) Nitrile Glove | (1) Bolin Chest Seal | (1) Flat Duct Tape, 1.89" x 2 yd. |
| (1) SWAT-T Tourniquet | | |

The new LEMK-CTP is an extremely low profile pouch that holds all essential trauma supplies, including a tourniquet, chest seal, nasopharyngeal airway, compression bandage, and room for your preferred hemostatic agent. Internally, the CTP pouch has elastic retainer bands on the top flap designed specifically to hold gloves, a tourniquet, and a decompression needle (not included). The bottom flap has a 4-way stretch pouch that is capable of holding more essential supplies. For its size, the CTP provides officers with a low profile/low signature pouch while not sacrificing space or supplies. Made of 500 denier Cordura nylon and is MOLLE compatible with PALS webbing.

Available in:

Size: 5.5" x 4" x 2.5"

#01329 / Kit / 13.6 oz.

#01327 / Bag / 4 oz.

#01329REF / Refill (Contents Only)

LEMK™-OR *Law Enforcement Medical Kit / Officer Response Kit*

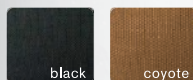

Patch attachment point
(shown with optional
Cross Patch, #901094)

KIT CONTENTS:

| |
|-----------------------------------|
| (2) Nitrile Glove |
| (1) Tourniquet (C-A-T or SOFTT-W) |
| (1) Israeli Emergency Bandage, 4" |

The LEMK-OR holds critical hemorrhage control supplies to treat moderate to severe bleeding, addressing the number one cause of preventable deaths, exsanguination. The LEMK-OR pouch utilizes a unique one-handed opening system that works by simply grabbing the opening loop and pulling up, out, and then down for rapid one-handed access to the internal medical supplies. Having the LEMK-OR on-person at all times gives confidence in knowing the trauma kit is within reach without being cumbersome in its size. Made of 1000 denier Cordura nylon and is MOLLE compatible with PALS webbing.

Available in:

Tourniquet Options: C-A-T or SOFTT-W

Size: 7.75" x 3" x 2.5"

#01152 / Kit / 10.4 oz.

#01151 / Bag / 4 oz.

FROM THE FRONT LINES TO THE HOME FRONT

CHINOOK LIFE™ KITS

EMERGENCY PREPAREDNESS MEDICAL KITS (EPMK™)

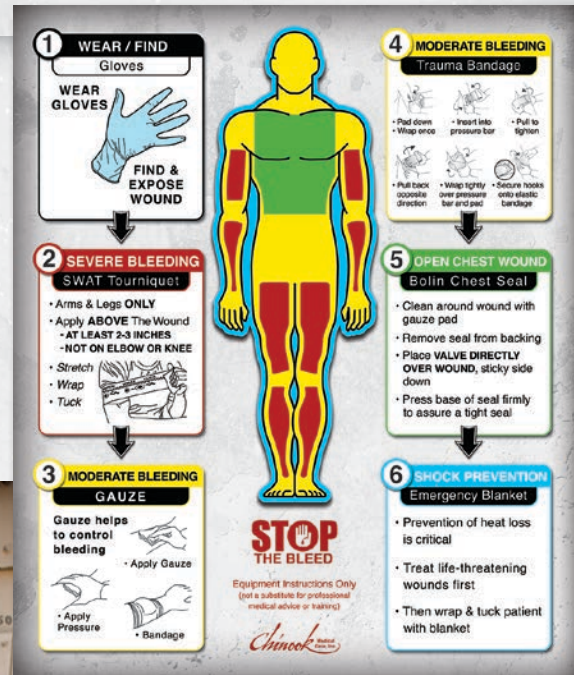

MASS CASUALTY / ACTIVE SHOOTER

CHINOOK LIFE™ KITS *Lifesaving Interventions For Emergencies*

Chinook's LIFE™ Kits are the answer to emerging standards and protocol for mass casualty and active shooter events. These kits allow bystanders to provide treatment on scene during the critical period of time between injury and arrival of medical professionals. Controlling blood loss is the first priority in these scenarios and a few minutes can mean the difference between life or death. Designed for any bystander to render lifesaving treatment at a school, office, public building or outdoor venue.

- Product instructions enable minimally trained individuals to provide care
- Supplies address severe bleeding, penetrating chest wounds*, and hypothermia*
(*Advanced Kit only)
- Compact & lightweight: fits in glove boxes, desk drawers, cargo pockets and more
- Reusable training kits available

LAW ENFORCEMENT MEDICAL MODULES (LEMM™)

Chinook's three-tiered Law Enforcement Medical Modules contain essential items to effectively control traumatic injuries associated with gunshot wounds, stabbings, and other life-threatening injuries typically encountered by law enforcement officers. Each module's treatment increases based on the operator's medical training. Packaged in a vacuum-sealed bag, they are designed to be carried at all times and will fit into a pocket or a small pouch.

LEMM™-PATROL *Law Enforcement Medical Module / PATROL*

Level: Basic **Treats:** Severe Bleeding

CONTENTS:

| | |
|-----------------------|---------------------------------|
| (2) Nitrile Glove | (1) Thin-H Bandage, 4" x 7.5" |
| (1) SWAT-T Tourniquet | (1) Petroleum Gauze, 3" x 9" |

| (1) Compressed Gauze | (1) Flat Duct Tape, 1.89" x 2 yd. |

#01383LE Size: 8.5" x 7.5" x 1" Weight: 12.8 oz.

*Also available in a Military version on pg. 30

The LEMM-LPI addresses the three leading causes of preventable death in a tactical scenario: extremity hemorrhage, tension pneumothorax, and airway obstruction. Packaged in a low-profile, vacuum-sealed bag with a zip closure opening, the LEMM-LPI is designed to be carried at all times when wearing an SOFBAV, MBAV, IOTV, IMTV, ISPC, or any other type of standard plate carrying vest. The medical module sits comfortably between a ballistics plate and the operator.

MEDICAL SUPPLIES

HEMORRHAGE CONTROL

SOF® TACTICAL TOURNIQUET WIDE (SOFTT-W)

More effective, easier to use. With a true 1.5" tourniquet strap and a quick-release, snap-lock buckle design that eliminates the need to ever rethread the strap, application is faster and easier. High-strength, lightweight alloy components are used in critical areas of function ensuring reliability in the most challenging of circumstances and on the largest of limbs. Single application method regardless of location. 15% lighter than the previous SOFTT and reduced size for easier storage.

#05189 / SOFTT-W (wide 1.5") / NSN: 6515-01-587-9943

#05149 / SOFTT / NSN: 6515-01-530-7015

#05252BK / RIGID TQ Belt Case for SOFTT/SOFTT-W, Black

#05253BK / RIGID TQ MOLLE Case for SOFTT/SOFTT-W, Black

COMBAT APPLICATION TOURNIQUET® (C-A-T)

The C-A-T Gen 7 is optimized for performance and reliability. The product features a single routing buckle system that allows for extremely fast application and effective slack removal, and simplified training with single protocol directions for all applications. The patented C-A-T is a true one-handed tourniquet proven to be 100% effective in occluding blood flow in both upper and lower extremities by the U.S. Army's Institute of Surgical Research.

#01294 / C-A-T / NSN: 6515-01-521-7976

#05250BK / RIGID TQ Belt Case for C-A-T, Black

#05251BK / RIGID TQ MOLLE Case for C-A-T, Black

RATCHETING MEDICAL TOURNIQUET™ (RMT)

The only self-locking tourniquet available. The RMT provides single-handed rapid large volume adjustment and high strength micro adjustment. The RMT is light, compact, sturdy and simple to operate. Easily applied with one hand if necessary. Ratchet precisely and forcefully closes the tourniquet.

#05196 / Red / Rescue Version

#05182 / Tan / Tactical Version

HEMORRHAGE CONTROL

SWAT-TOURNIQUET™ (SWAT-T)

The SWAT-T is a unique and multipurpose dressing. Its name provides a description for usage – Stretch, Wrap, and Tuck – and also the communities for whom it was developed – military and civilian Special Weapons and Tactics teams. These teams operate in an environment that has a high incidence of penetrating trauma, and most (two-thirds) of preventable deaths in the operational environment are from extremity bleeding.

#500470 / Black

#500999 / Orange

ABDOMINAL AORTIC & JUNCTIONAL TOURNIQUET™ (AAJT)

The AAJT is the first device to provide stable and complete occlusion of flow of blood to the lower extremities, pelvis and upper extremities. It has 510(k) clearance from the FDA for difficult to control inguinal and pelvic hemorrhage. It can be applied to the mid-abdomen, tightened and inflated and may remain on for up to an hour safely. It is also FDA cleared for all junctional hemorrhage sites (axilla and inguinal placements) and can remain on for up to 4 hours in these locations. The AAJT is the ONLY junctional tourniquet to have saved human life in upper and lower junctional hemorrhage. It is also the ONLY junctional hemorrhage to have human research showing it is safe and effective.

#05246 / NSN: 6515-01-616-4999

SAM® JUNCTIONAL TOURNIQUET

The SAM Junctional Tourniquet for hemorrhage control is designed to control bleeding where tourniquets would not be effective, such as with IED/blast injuries or high-level amputations. With these types of injuries, time is of the essence. The SAM Junctional Tourniquet offers a simple design. It is compact, easy to use (only four steps), and quick to apply (typically under 25 seconds). The Target Compression Device (TCD) is placed at or near the injury site and pumped up until the bleeding stops. Two TCDs can be used to occlude blood flow bilaterally if needed. The rugged design ensures that the device stays firmly attached to the patient during transport. Designed to exceed MIL-STD-810g requirements.

#05248 / NSN: 6515-01-618-7475

HEMORRHAGE CONTROL

QUIKLOT® COMBAT GAUZE™

The ease of gauze. The power of QuikClot. Pack it. Wrap it. Stop bleeding cold. The power to stop even the worst arterial and venous bleeding. The gauze is so pliable that it conforms to virtually any size or shape of injury. It is easily removed once clotting has taken place. Vacuum-packed, X-ray detectable.

#05168LE / Z-Fold Gauze / 3" x 4 yd.

#05168MT / Z-Fold Gauze / 3" x 4 yd. / **NSN: 6510-01-562-3325**

#05190 / Trauma Pad / 12" x 12" / **NSN: 6510-01-583-4870**

QUIKLOT® ACS+

When dealing with large, severe injuries on the battlefield or at home, the ACS+ sponge can be packed to conform to the shape of the wound and is easily removed in the hospital setting. Designed for EMS, Military and Law Enforcement to stop the bleeding fast on large traumatic wounds.

#05162 / 100 g Sponge / **NSN: 6510-01-534-2579**

QUIKLOT® 1ST RESPONSE

Designed for First Responders to help save lives right at the scene of accidents, crimes, fires and other emergencies. Stops high-volume bleeding from open trauma wounds in seconds.

#05163 / 25 g Sponge (5/pk)

HEMORRHAGE CONTROL

CELOX™ GAUZE & CELOX RAPID GAUZE

Celox Rapid gauze stops severe arterial bleeding with only one minute of compression applied, saving valuable time as well as reducing blood loss. Celox Rapid forms an adhesive gel that seals the wound. Independent testing showed 100% success in achieving hemostasis and reduced blood loss compared to other treatments. The product has also been tested in a model of casualty evacuation, achieving 100% successful transport without rebleeding. Z-folded.

#05214 / Celox Rapid Gauze / 3" x 5' / NSN: 6510-01-623-9903

#05184Z / Celox Gauze / 3" x 10' / NSN: 6510-01-623-9594

CELOX™ HEMOSTATIC GRANULES

Celox is a high-performance hemostatic material suitable for everything from deep arterial bleeds to superficial wounds. It is a proprietary marine biopolymer chitosan designed to stop high-volume arterial bleeding. No known side effects and works on all blood temperatures, even heparinized blood. Granules form a gelled mass to protect the clot. The gelled material is easy to remove. The applicator version plunges the granules deep into the wound to the source of the bleed.

#05164 / 15 g

#05165 / 35 g / NSN: 6510-01-549-6058

#05169 / Applicator, 6 g / NSN: 6510-01-623-9943

HEMCON® CHITOGAUZE® PRO

ChitoGauze PRO maximizes hemostatic performance and reduces the risk of rebleeding by providing effective hemostasis outside of the normal clotting cascade. ChitoGauze PRO also has natural antibacterial properties against a wide range of gram-positive and gram-negative microorganisms, which may help reduce the risk of infection due to debris and the environment before the casualty receives advanced treatment. 4" x 4 yd.

#05188

HEMCON® BANDAGES

The HemCon Bandage is an FDA cleared, pliable, sterile, chitosan dressing capable of stopping severe external hemorrhage following trauma and penetrating injury. Safe, durable, highly effective, and does not contain human proteins or clotting factors.

#05123 / Bandage PRO / 2" x 2" / NSN: 6510-01-619-3523

#05129 / Bandage PRO / 4" x 4" / NSN: 6510-01-502-6938

#05179 / Strip First Aid / 1" x 4"

HEMORRHAGE CONTROL

ISRAELI EMERGENCY BANDAGES

Proven product that works as several different devices: primary dressing, pressure applicator, secondary dressing, tourniquet, and for entry and exit wounds or double padding with the sliding/mobile pad version. Sterile, non-adherent and easy-to-use, this bandage is designed to treat every possible bleeding wound in the most extreme conditions. Can even be applied with one hand.

#05130 / 4" / NSN: 6510-01-460-0849

#05131 / 6" / NSN: 6510-01-492-2275

#05150 / 12" x 12" Abdominal / NSN: 6510-01-532-6656

OLAES® MODULAR BANDAGES

The Olaes Modular Bandage takes on the challenge of increasing the effectiveness of modern tactical combat casualty care. Cover minor wounds, apply truly effective pressure dressings, apply occlusive dressings, and have the ability to pack severe wounds with one bandage. Contains: elastic bandage, wound pad, 3 meters of sterile 4-ply gauze, plastic sheeting to act as an occlusive dressing, and a pressure bar that focuses pressure on wound site.

#05175 / 4" / NSN: 6510-01-558-3342

#05176 / 6" / NSN: 6510-01-558-3443

BLAST® BANDAGE

The Blast Bandage is designed to provide the ability to quickly package traumatic amputations, burns and large pattern wounds with minimal use of supplies and minimal effort. Provides a 20" x 20" treatment area, but packs to about the size of a 4" combat bandage. Features a large non-adherent wound pad, a removable occlusive layer that will cover a 19"x 19" area, and multiple points of adhesion to prevent slippage.

#05177 / NSN: 6510-01-586-4314

H&H CINCH AND H BANDAGES

Six first aid products in one, the H&H Cinch Tight is designated as the Standard Combat Dressing by the U.S. Marine Corps and is currently fielded by U.S. Special Forces. For First Responders, Military, Law Enforcement and related fields, it provides a fast, effective tool for many kinds of traumas and injuries (particularly those involving arterial bleeding in extremities). Vacuum-packed for small, easy storage. The H Bandage will also perform as a tourniquet for arterial bleeding and hemorrhaging in limbs, deployed one-handed for use under any condition.

#05141 / Cinch Tight / 8" x 10" Pad / NSN: 6510-01-503-2109

#05151 / Big Cinch / 12" x 16" Pad / NSN: 6510-01-532-8930

HEMORRHAGE CONTROL

BERRY-COMPLIANT COMPRESSED GAUZE

Chinook Gauze is a sterile 6-ply roll of gauze vacuum-sealed to minimize size while maximizing capability. Compact and yet easy to use when removed from its packaging. 4.5" x 4.1 yd.

#05005

H&H PRIMED COMPRESSED GAUZE

Capable of taking care of the moderate to severe wounds involving heavy blood loss. Vacuum-packed 6-ply gauze roll for small, easy storage yet expands to cover large areas. TAA compliant. 4.5" x 4.1 yd.

#05143 / NSN: 6510-01-503-2117

Z-PAK DRESSING

A highly absorbent cotton wound packing that is "Z-folded" for ease in packing wounds. Sterile, lint-free, and vacuum-sealed in a 2 mm outer pack for greater durability. Inner containment sleeve aids in dispensing and maintains product cleanliness. 4.5" x 4.1 yd.

#05156 / NSN: 6510-01-527-8329

KERLIX™ GAUZE ROLL

Pre-washed, fluff-dried roll features 6-ply construction and finished edges. Easy to open with one hand. Roll is fully expanded to begin with to pack larger areas. 4.5" x 4.1 yd.

#100041 / NSN: 6510-00-058-3047

COFLEX® FOAM DRESSING (UMAFD, AFD, LF2)

Universal Medic Absorbent Foam Dressing (UMAFD): All-in-one trauma bandage system that quickly secures wound. High absorption, high compression latex bandage.

Absorbent Foam Dressing (AFD): All-in-one foam pad dressing and latex-free cohesive bandage ideal for wound care and emergency applications. Absorbs equal to 29 gauze pads.

Latex-Free Foam Bandage (LF2): A quick-stick, latex-free foam bandage that performs as well as latex bandages. Can be used for all cohesive bandage applications.

AIRWAY MANAGEMENT

HYFIN® CHEST SEALS (VENTED & NON-VENTED)

Providing two vented chest seals in one unique package for treatment of both entry/exit or multiple penetrating injuries to the chest. The HyFin Vent Chest Seal design provides 3-vented channels that prevent airflow into the chest cavity during inspiration while allowing air to escape through the vent channels during exhalation. Superior adhesion, rugged, easy-to-open foil pouch. Each chest seal includes a gauze pad to wipe the wound surface prior to application. 6" x 6"

#600351 / Vented, Twin Pack / NSN: 6510-01-642-6212

#600078 / Non-Vented, Single Pack / NSN: 6515-01-532-8019

HALO® CHEST SEAL & HALO XL TRAUMA DRESSING

The HALO XL is a highly aggressive oversized transparent occlusive dressing designed primarily to cover larger blast wounds. The HALO Chest Seal features the same properties and is the essential choice for managing penetrating chest trauma. 100% translucent and no vent to occlude. Latex-free.

- Superior Hydrophilic gel adhesion; no residue once removed
- Occlusive seal in the presence of excessive blood or heavy perspiration
- Large pull tab for easy removal
- Durable protective packaging, notched on all four corners for easy opening
- Performs under extreme temperatures (below 32°F to over 140°F)

#12099 / HALO Seal (2/pk) / 5.5" x 8.25" / NSN: 6510-01-581-0553

#12098 / HALO XL / 8.5" x 12" / NSN: 6510-01-589-0995

SAM® CHEST SEALS

The SAM Chest Seal is an occlusive dressing designed for treating open chest wounds. Features strong adhesive, flexible construction, larger dressing area and includes a highly absorbent 5" x 9" pad for cleaning the wound. Both packaging and chest seals are optimized for night vision. Latex-free.

#12111 / With Valve / NSN: 6510-01-606-7097

#12110 / Without Valve (2/pk)

#12114FK / Combo / Folded Kit

BOLIN CHEST SEAL™

A sterile occlusive chest wound dressing for treating open pneumothorax and preventing tension pneumothorax that results from penetrating chest trauma. The triple-valve design allows air and blood to escape while preventing the re-entry of either. Strong enough to seal over hair and blood and flexible enough to be removed/reapplied. 6" diameter. Latex-free.

#12101 / NSN: 6510-01-549-0939

AIRWAY MANAGEMENT

SUCTION EASY

This compact, powerful suction device is designed to effectively evacuate the oral pharynx in emergency situations. It has a bulb designed to provide a vacuum force of approximately 100 mm Hg. Contents are expelled into a collection bag attached to the outlet port. Small enough to fit in a pocket.

#02130 / NSN: 6515-01-516-3120

I-GEL®

i-gel Supraglottic Airway

Made from a medical-grade thermoplastic elastomer, i-gel has been designed to create a non-inflating, anatomical seal of the pharyngeal, laryngeal and perilaryngeal structures while avoiding compression trauma. It is indicated for use in securing and maintaining a patent airway in routine and emergency anesthetics of fasted patients, during spontaneous or intermittent positive pressure ventilation, and during resuscitation of the unconscious patient, by personnel who are suitably trained and experienced in the use of airway management techniques and devices.

i-gel O2 Resus Pack

The i-gel O2 Resus Pack includes an i-gel O2 with an easily removable inner tray containing a sachet of lubricant and an airway support strap, all packaged in a specially designed, clear, sterile, and rigid pack. This unique design ensures protection of the contents, both in transit and in storage. Adult sizes.

CIRCULATION

IV ADMIN SET, COILED TUBING, 10-DROP

The IV Admin Set, Coiled Tubing, 10-Drop is designed for confined spaces and/or when patient movement is a concern. With the inclusion of the coiled tubing, this administration set reduces tube entanglement that normal administration sets typically incur when working in a non-clinical environment. The administration tubing is 96" when stretched, yet still retains its coil memory when released with minimal-to-no recoil.

#C45110 / 50/Case / NSN: 6515-01-561-6204

#C45110EA / Single Unit / NSN: 6515-01-562-6724

IV ADMIN SET, 15-DROP, NEEDLE-FREE

First needle-free infusion port of its kind! Least fluid transfer upon disconnect. Clinically proven for over a decade. Includes pre-slit needle port, luer lock syringe needle-free port, extension set (detachable hep lock set) to be able to disconnect and put another set on the end.

#02159

CRITICAL CARE LINE IV/IO INFUSION SET

Critical Care Line, IV/IO Infusion Set is a lightweight, low-cube medical device that allows for the infusion of all blood products, crystalloids, and emergency medications. All in a single device.

#02202

FAST1® INTRAOSSEOUS INFUSION SYSTEM

The first FDA-cleared IO system designed specifically for use in the sternum during adult and adolescent emergency intervention. When normal peripheral intravenous access fails, FAST1 helps emergency care providers quickly establish vascular access and administer emergency fluids and medications safely and effectively through the bone marrow of the manubrium. FAST1 is safe to use in patients 12 years of age and older and can be used during CPR when a cervical spine collar is in place.

- Direct: Quickest route to the heart of any IO access device and peripheral IV
- Fast: Delivers medication two to three times faster than tibial IO
- Precise: Exact placement every time
- Safe: Automatic depth control for safe delivery above the lungs and heart
- Easy: Simple to use
- Sterile: Single-use, disposable product with no risk of cross-contamination
- Flexible: Soft, low-profile, secure tubing
- Sleek: Lightweight design allows portability in medic packs

CIRCULATION

ARROW® EZ-IO® INTRAOSSEOUS VASCULAR ACCESS SYSTEMS

Packing the EZ-IO means you've got a combat-proven access device that is immediate, safe, easy and effective. The EZ-IO can be set up in a number of mission-specific configurations, providing you with multi-site, user-controlled access ports for your team or unit's immediate critical care needs. The lightweight Manual and Sternal EZ-IO Needle Sets are undaunted by austere conditions while the powered EZ-IO remains the device of choice in transport, as well as field support areas. The EZ-IO stands beside you as field proven for resuscitation, sedation, paralyzation, antibiotic therapy and fluid maintenance. The EZ-IO creates a stable port into the intraosseous space accessing the central vascular system within seconds, causing minimal trauma to the patient. Multiple insertion points safe for patients of all weights. Standard luer-lock catheter and simple removal – no special tools needed.

HYPOTHERMIA

HELIOS® HYPOTHERMIA PREVENTION SYSTEM

Two-piece system allows different levels of coverage to accommodate time available and patient accessibility. Blanket anchors to protect against rotor wash and high winds. One 9" x 13" active warming pack can be placed where needed. High-visibility pocket for placement of STAT cards or other triage cards.

#05115

BLIZZARD SURVIVAL BLANKET

The Blizzard Survival Blanket is a leader in thermal protection for casualties. This extra-large blanket wraps around a casualty and seals with a self-adhesive closure. It can easily be reopened for examination or medical intervention. Blanket traps warm air and elastication draws the material to the body reducing cold spaces and heat loss, and silvered surfaces block heat loss by radiation. Completely waterproof and windproof.

#05134 / NSN: 6532-01-524-6932

READY-HEAT™ BLANKETS

Disposable medical blanket is heated to approximately 104°F in 15-30 minutes once exposed to ambient air. Temperature is sustained for 10 hours. Designed as a first responder blanket, the Ready-Heat II warms in 10 minutes and is ideal for treating shock and hypothermia.

- #01143 / Tagline Kit: Carry Bag, 250' Floating Rope, Locking D Ring, Weak Link, Blk Double-Lock Carabineer

VLR Features:

Fast Deployment

- No assembly required
- Integrated Hoist System for quick lifting, minimal training
(pre-assembled vertical lift and attachable horizontal straps)
- Rapid Deployment Bag included with every sled

Strong, Durable

- Utilizes durable high density polyethylene
- 9,000 lb. rated perimeter tether secures the warfighter and expedites the evac process
- VL Rescue Sled utilizes 4,000 lb. rated cross straps with side release buckles for ease of use
- DeCon capable

Lightweight

- 17.2 lb. (10 lb. sled only)
- Few components enabling immediate deployment and minimal weight

Integrated Hoist System

- Capable of vertical and horizontal lift
- Hoist system rated to 9,000 lb.
- Helicopter hoist straps included with every sled
- No assembly required at time of extraction and vertical lifting

IMMOBILIZATION / TACTICAL EVACUATION

BAK-PAK II™

This Long Spine Immobilization Board works as well with adults as with pediatric patients and does the job through rough terrain. Features include: concave design to minimize lateral movement, compatible with head immobilization devices, raised handhold for easy gripping and strap threading, seamless construction to reduce contamination, high-impact resistance, foot-end taper to facilitate confined area extrication, and X-ray and MRI translucent.

#02114 / Yellow BAK-PAK II and Multi-Color Spider-Strap Combination

SPIDER-STRAP™

The Spider-Strap has ten points of attachment and secures easily to the shoulder and foot area of the spineboard. Constructed of heavy-grade polypropylene with long-lasting hook-and-loop fasteners, it can be used on either pinned or non-pinned boards. OD.

#011150D / XL / NSN: 6530-01-593-0010

RAPID TRIAGE RIBBON MODULE

Designed with input from veteran law enforcement and medical professionals familiar with the complex nature of active shooter and mass casualty incidents, this compact, easy-to-use system allows any first responder to quickly triage victims. Clip the ring onto a belt loop, or other attachment point, and simply tear off the pre-cut ribbon of choice to tie around the victim's arm or leg. Includes 30 1" x 28" ribbons in the four common triage colors: green (12), yellow (6), red (6), and black/white (6).

#01401

TACTICAL COMBAT CASUALTY CARD (TCCC)

Waterproof, tearproof casualty triage card for documentation of care with elastic loop for easy attachment. 4.5" x 7"

#14000 / 25/pk

TACTICAL COMBAT CASUALTY RESPONSE CARD (TCCRC)

Waterproof, tearproof four-page card used for CASEVAC/MEDEVAC patient diagnostics, treatments, notes, etc. 5" x 6"

#14001

IMMOBILIZATION / TACTICAL EVACUATION

FOXTROT® LITTER

Small enough to attach to your kit or another bag, but is still functional in a combat or rescue environment. Lightweight and compact, casualties can be dragged, carried, and lowered down stairwells with a piece of equipment that weighs less than five pounds. Rapid deployment and can be moved by one responder. Multiple rigging options. Comes with tan carrier.

#01131CT / NSN: 6530-01-560-8880

EVAC POLELESS LITTER

Designed for rapid evacuation of casualties by either dragging, carrying or lowering. Mesh material reduces weight and allows for drainage. Litter is reinforced at high friction points for durability. Lightweight and compact. Tan.

#01136

OPTIMUM TRACTION DEVICE

Industry standard for field femoral traction. Can easily be carried in any medical kit. Pole adjusts quickly for adult or pediatric application. Does not require patient rollover or extraneous leg raising. Comes with storage pouch and complete instructions. Boot hitch included.

#05201BK / Black

#05201OR / Orange

MUSTANG TRACTION SPLINT

Designed specifically for confined space use and extremely lightweight. Remains within the profile of the body, which does not require extension beyond the foot. Unique design allows for distal or proximal application to treat femoral or humeral fractures. X-ray/CT scan translucent. Black.

#05200BK

BERRY-COMPLIANT CRAVAT/TRIANGULAR BANDAGE

Chinook's Cravat/Triangular Bandage is the largest triangular bandage on the market and is Berry Amendment compliant. Most triangular bandages lack the size to adequately sling and swath a fully kitted soldier. Chinook's Cravat/Triangular Bandage is 46" x 46" x 65", making it ideal for splinting and bandaging while also allowing proper length for improvised tourniquet use. OD.

WOUND / BURN / BLISTER CARE

WATER-JEL® BURN DRESSINGS

Water-Jel Burn Dressings are made with a scientifically formulated cooling gel and utilize medical-grade nonwoven pads. These non-adherent dressings are soaked in a water-based/water-soluble, bacteriostatic and biodegradable gel and sterilized to ensure a contamination-free atmosphere for emergency treatment of burns. Stops burn progression, cools the skin, eases pain and protects against airborne contamination.

#03641 / Burn-Jel Packet (6/pk) / 3.5 g

3M™ AURA™ PARTICULATE RESPIRATOR N95

Lightweight, three-panel mask filters dust and other particles, while allowing for easy breathing. Can also be used to reduce the inhalation of certain airborne biological particles. Features a low-profile, collapse-resistant design and a soft nose foam pad. Flat-fold packaging.

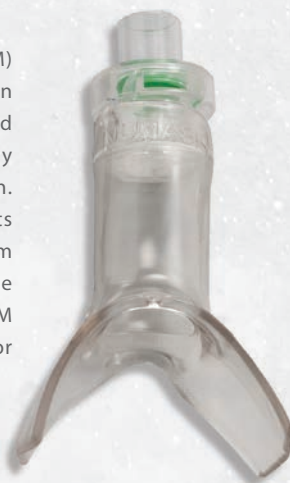

#01195

NUMASK® BASIC CPR KIT

The NuMask CPR IntraOral Mask (IOM) utilizes intra-oral placement to obtain a leak-free, wet seal. The one-handed grip allows a single rescuer to easily obtain perfect seals with every breath. The smooth-flow, one-way valve with its hydrophobic filter also allows maximum protection for both the rescuer and the victim. The Basic CPR Kit includes an IOM and instruction guide in a poly bag for compact carry.

#01632

AMBU® RES-CUE MASK

Pocket-sized reusable mouth barrier has a transparent dome, one-way valve and filter. Easily seals to all face sizes. Nylon bag includes mask, a set of vinyl gloves, and two sealed alcohol wipes.

#01180

SHARPS CONTAINER

Convenient size for easy transport for EMS and Fire/Rescue. 1 quart.

#03646

SHARPS DART

Small size fits in carry bags for the containment of used IV catheters and small syringes.

#03674

EYE WASH

Sterile eye irrigation solution that cleanses, refreshes and soothes eye irritations. 4 oz.

#01095

P.A.W.S. PERSONAL ANTIMICROBIAL WIPES

66.5% ethyl-alcohol helps you meet CDC, APIC and OSHA hand-washing recommendations. Aloe vera adds moisture with each use. Individually wrapped 5" x 8" towelettes.

#03602 / 100/Box

DIAGNOSTIC / MONITORING

E.N.T. BASIC & DELUXE CORPSMAN KITS

The most versatile ENT kit ever made. Standard issue to many military personnel. Lightweight, durable and portable while also providing excellent performance and versatility.

Contents:

- ENT pocket light with clear lens
- Lighted curette
- Nylon eye loop
- Eye magnet
- 10 disposable adult specula
- Red lens
- Cobalt blue lens
- Otoscopic head
- Speculum adaptor
- Fiber optic light bender/nasal head
- Spare ENT pocket light batteries (2 AAA)
- Spare ENT pocket light bulb
- Illuminated magnifying lens
- Fluorescein strips
- Instructions
- Soft case with zipper and mesh pouches

#01570 / Basic

#01571 / Deluxe

Same contents as Basic Kit plus one Heine Mini 3000 Ophthalmoscope and one replacement lamp

E.N.T. POCKET LIGHT

Lightweight, compact, waterproof, inexpensive and durable, this professional quality otoscope is convenient for oral, nasal and ear exams. Xenon lamp provides high intensity (6000 candlepower or 600% brighter than a standard pocket light) from 2 AAA batteries.

Contents:

- Patient exam light
- Otoscopic head
- 1 reusable adult speculum
- 3 disposable adult specula
- 3 disposable pediatric specula
- 1 fiber optic light bender
- Batteries
- Instructions

#700129 / Carrying Case

DIGITAL THERMOMETER

Easy to read, very durable, and works well in cold conditions. Features automatic turnoff and a beeper that sounds when peak temperature is reached.

Range: 90-107° F.

#01810

HIGH ALTITUDE

ULTRA-LITE & ORIGINAL GAMOW BAG (HYPERBARIC CHAMBER)

Pronounced 'Gam-off', this is a unique, portable Hyperbaric Chamber for the treatment of altitude sickness. By increasing air pressure around the patient, the Bag simulates descent of as much as 7,000 feet, thus relieving AMS (Acute Mountain Sickness) symptoms. The Bag is constructed of durable nylon and reinforced with circular nylon straps. A lengthwise zipper permits easy access and egress for the patient, and four clear windows provide visual contact. The Bag is pressurized with ambient air to 2 lb per sq in. by use of a foot pump.

OXYGEN EQUIPMENT

OXYGEN SYSTEMS

Lightweight, compact and easy to transport, our oxygen systems have been selected for ease of use in challenging environments. For emergency or supplemental use. All systems are reusable. We only supply unfilled tanks.

Each system includes (items also available separately):

- Cylinder with toggle valve
- Regulator with click dial from 0.5 to 15 liters per minute, unibody yoke, CGA 870 connection, pressure gauge
- One oxymizer (device for on-demand, low concentration delivery)
- One non-rebreather mask with reservoir for high concentration delivery
- One nasal cannula
- Double padded, dual strapped backpack

#06740 / M6 / 161 L / 5 lb.

If the standard nasal cannula flow rate is 2 lpm, system lasts for 1:25 hours (4:15 hours with oxymizer). Comes in small pack.

#06741 / D / 398 L / 8.5 lb.

If the standard nasal cannula flow rate is 2 lpm, system lasts for 3:32 hours (10:06 hours with oxymizer). Comes in medium pack.

#06742 / Jumbo D / 623 L / 12 lb.

If the standard nasal cannula flow rate is 2 lpm, system lasts for 5:11 hours (15:33 hours with oxymizer). Comes in large pack.

ALUMINUM ALLOY CYLINDERS

Up to 40% lighter than some steel cylinders. Made of high-strength aluminum alloy with a corrosion-resistant interior surface. Brushed body finish with a green shoulder and durable heat-sensitive clear coating. Includes toggle valve. Unfilled.

#06720 / M6 / 161 L / 2.3 lb

#06726 / D / 398 L / 5.1 lb

#06715 / Jumbo D / 623 L / 8.4 lb

OXYGEN REGULATOR - 15 LPM

Smaller and lighter than other regulators. Includes an impact-resistant gauge with protector and 11 individual click settings for various flow rates. Features click dial from 0.5 to 15 lpm, unibody yoke, CGA 870 with barb outlet, pressure gauge.

#06702

OXYMIZER® DISPOSABLE OXYGEN CONSERVER

Oxygen-conserving device for on-demand, low concentration delivery. Delivers up to a 4:1 savings ratio, which permits reduced oxygen costs up to 75%. Can be used at liter flows up to 15 lpm. Effective with all oxygen sources.

#06502

OXYGEN PACK

Large bag features mesh pockets built into the lid to carry gloves and supply tubing. A generous outside pocket is large enough to fit a bag valve mask and V-vac suction device, oral or nasal airways. All bags feature padded pack straps. Large bag has additional top and side fluid-proof grab handles.

#06728 / Large (Jumbo D), Fits 425, 647 / 23" x 8" x 11" / Made in USA

#06727 / Medium (D), Fits 425 / 23" x 6" x 6"

#06698 / Small (M6/M9), Fits 164 / 16" x 6" x 7.25"

Request For Quotes

Please send RFQs to sales@chinookmed.com. Please include a list of all the medical items you are looking for even if you do not see them here or on our website.

Shipping & Handling

Orders are processed the same business day and stock items typically ship within 48 hours. If the order is for large quantities, special items, or out-of-stock items, we will provide you with the approximate shipping date. Please note that kits and modules are built-to-order to ensure that components are from the latest inventory to provide the longest shelf-life possible.

Regular shipping is via UPS Ground for all physical addresses and USPS Priority Mail for all U.S. APO/FPO addresses and PO Boxes.

If your order is time-sensitive, you can expedite shipment via the following options.

Note: Expedited orders must be placed by 1 p.m. Mountain Standard Time / 3 p.m. Eastern Standard Time to ship the same day. Weekends and holidays do not count as shipping days.

- UPS 3-Day Select
- UPS 2nd Day Air
- UPS Next Day Air Saver (delivery by 3 p.m./4:30 p.m. depending on destination)
- UPS Next Day Air (delivery by 10:30 a.m./noon depending on destination)

Shipping is calculated based on real-time published rate figures.

All international orders will ship UPS (or the most expedient way per your request). **Please Note:** Any customer requesting USPS Priority Mail International assumes all responsibility for lost or damaged goods and will not be reimbursed or reshipped at Chinook Medical Gear's expense. We will complete all required international documentation. Recipient is responsible for all duties and taxes that are assessed by the destination country customs office.

Warranty/Return Policy

All item returns must be received within thirty (30) days of purchase and may be subject to a 15% restocking fee. If the product is defective, we will either refund your purchase price (including shipping) or send a replacement at our cost. All product warranties should be addressed through the manufacturer. All purchases of regular sale items are final. Please send a copy of your invoice and the reason for your return to the following address:

Chinook Medical Gear, Inc.
Attn: RETURNS
54 Girard St., Suite A
Durango, CO 81303

Payment

We accept Visa, MasterCard, American Express, Discover, checks, money orders, EFTs, and bank wires. We welcome purchase orders as well. New customers wishing to open an account with terms require credit approval.

Customer Service

Please call 800.766.1365 to speak with a representative. If you require special pricing or a bulk purchase, please contact us for a free quote. Also, if you are in need of medical related items not listed in our catalog or on our website, please contact us and we will source the products you need. Business hours are 8 a.m. – 5 p.m., Mon-Fri, MST.

Terms & Conditions and Liability

Customer warrants that it is appropriately licensed or registered and in compliance with any and all requirements of the Food and Drug Administration and State regulations for any products ordered. Customer further warrants that all individuals using products purchased from Chinook Medical Gear (CMG) are adequately trained in their use, and Customer ensures the use of such products to be according to any instructions contained in packaging of such product, and to be in accord with current standards of care applicable thereto. CMG shall not be liable for any special or consequential damages that result from the use of, or the inability to use, the materials purchased or the performance of products purchased, even if CMG has been advised of the possibility of such damages.
